 EMWD Grid: _____ Fire Agency Requirements or Conditions of Approval – Submitted?: Yes No⁽³⁾
 Comments: _____

⁽¹⁾ EMWD's test reports are based on a computer model of the water system – no field-tests will be conducted. All tests (except for Residential Single-Owner Lot) include Hydraulic Boundary Conditions which provide available min. and max. pressures under multiple demand scenarios.
⁽²⁾ One-time recertification is limited to results that were issued within the last 6 months. Recertification is comprised of a one-page form.
⁽³⁾ EMWD's test report will be based on the Test Parameters, as identified above by the customer. If Fire Agency Conditions were not provided by the customer, then, to complement EMWD's test report, the customer shall provide formal conditions during Fire-Agency or EMWD's Plan Check. In the future, if Flow requirements increase and/or point(s) of connection differ, then a new test shall be requested at the requester's expense, otherwise, the issued test report would still be valid, with or without attached conditions.
