## MURRIETA ROAD BOOSTER STATION

**PROJECT DESCRIPTION:** Eastern Municipal Water District (EMWD) is replacing its Murrieta Road Booster Station facility, which will provide additional water supply reliability to the region.

The existing Murrieta Road Booster Station is near the end of its useful lifespan and is no longer adequate to efficiently meet the needs of the growing region which it serves. The new booster station will not only increase capacity, but will also operate more efficiently.

In early 2024, EMWD will begin work to construct its new facility along Murrieta Road, just north of Watson Road. Following the completion of the new facility, EMWD will decommission and remove the existing facility, on Murrieta Road, just north of Ethanac Road.

During construction, residents may experience increased traffic on Murrieta Road and surrounding thoroughfares. Heavy equipment will be delivered to the site on an as-needed basis.

It is anticipated that a majority of the work will take place on weekdays during daytime hours. Project information may be found online at [www.emwd.org/perris-projects](http://www.emwd.org/perris-projects).
