**Subject: EMWD Construction Near Your Residence**

Dear Neighbor:

On behalf of Eastern Municipal Water District (EMWD), we would like to provide you with information regarding upcoming construction activities planned near your residence in Moreno Valley.

Beginning in mid-December 2020, EMWD will begin work to construct two groundwater wells along Ironwood Avenue, between Heacock Street and Nita Drive. The first of these two wells will be located on Ironwood Avenue, just west of Davis Street. The second will be located on Ironwood Avenue, just across from Kevin Street. These two wells are an important part of our Perris North Groundwater Program which will help provide long-term water quality benefits to the region.

As part of the construction, EMWD will install temporary, 24-foot-high sound walls around the project site. These temporary structures are designed to limit noise and light from the project site. In early January 2021, the well drilling process will begin and requires 24-hour per day operations to ensure the structural integrity of the groundwater well. The well drilling process is completed in two intervals, each lasting several weeks.

EMWD will have sound and vibration monitors at both project sites. The noise emitted from well drilling is similar in decibels to that of a running shower or office conversation. Following the completion of drilling activities, EMWD will bid a second project to construct the piping and motors needed to operate the well. That activity will be limited to daytime only work.

EMWD appreciates your patience and understanding as we work to complete this important project that will help provide your family with a safe and reliable water supply source for future generations. As part of our commitment to our customers, EMWD will keep you updated on the status of this work.
